UNICA ACOUSTIC

Acoustic comfort. Architectural clarity.

Acoustic comfort is an essential part of interior design. Unica Acoustic designs and manufactures standard and bespoke PET felt surfaces for architectural spaces.

1

Sustainability

Our material approach focuses on recyclable felt technologies and responsible production. Sustainability is considered alongside the functional life of the product and its role in the space.

2

Design & Performance

Acoustic performance is an essential part of interior design. Our standard collections and bespoke felt surfaces help control sound reflections while responding to the architectural requirements of each space.

3

Aesthetics

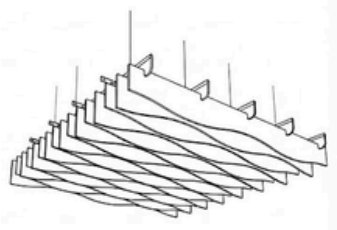
Acoustic performance and visual quality are developed together. A broad colour palette and the versatility of felt allow us to create surfaces that complement the architectural concept and give each space its own character.

UNICA ACOUSTIC

Acoustic Ceiling Systems

Unica Acoustic develops ceiling rafts, baffles, 3D grids and bespoke systems for architectural projects.

Full ceiling coverage or targeted rafts and baffles can be developed to suit the acoustic brief. Colours, layout and available 9, 12, 20 and 24 mm felt thicknesses are coordinated for each project.



Baffle

Acoustic Wall Panels

Wall surfaces that bring acoustic performance into the architectural design.

Choose from our standard collection or develop a bespoke form for the architectural concept. A broad colour palette and 9, 12, 20 and 24 mm felt thicknesses allow the wall surface to be coordinated with the project.

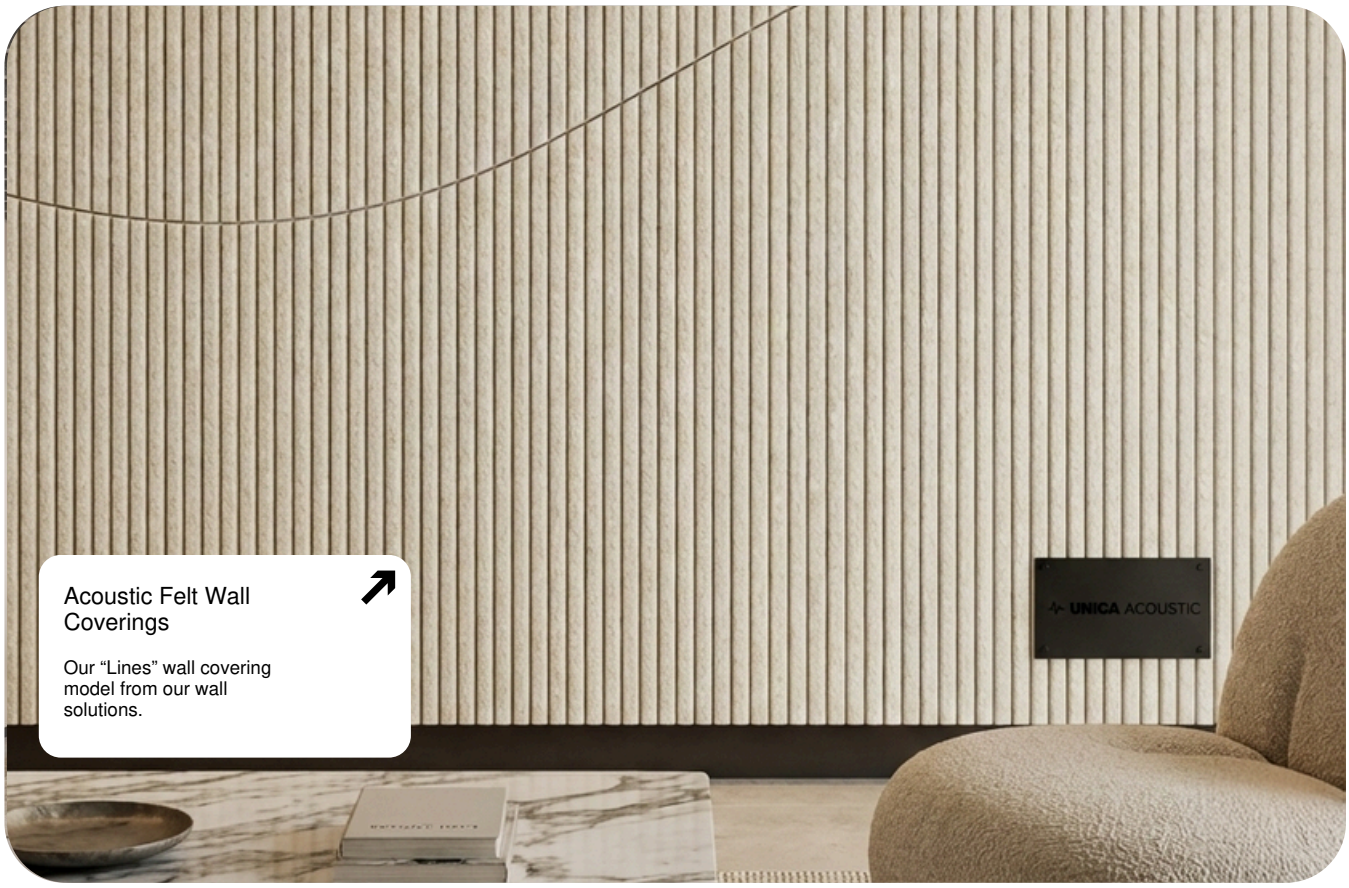
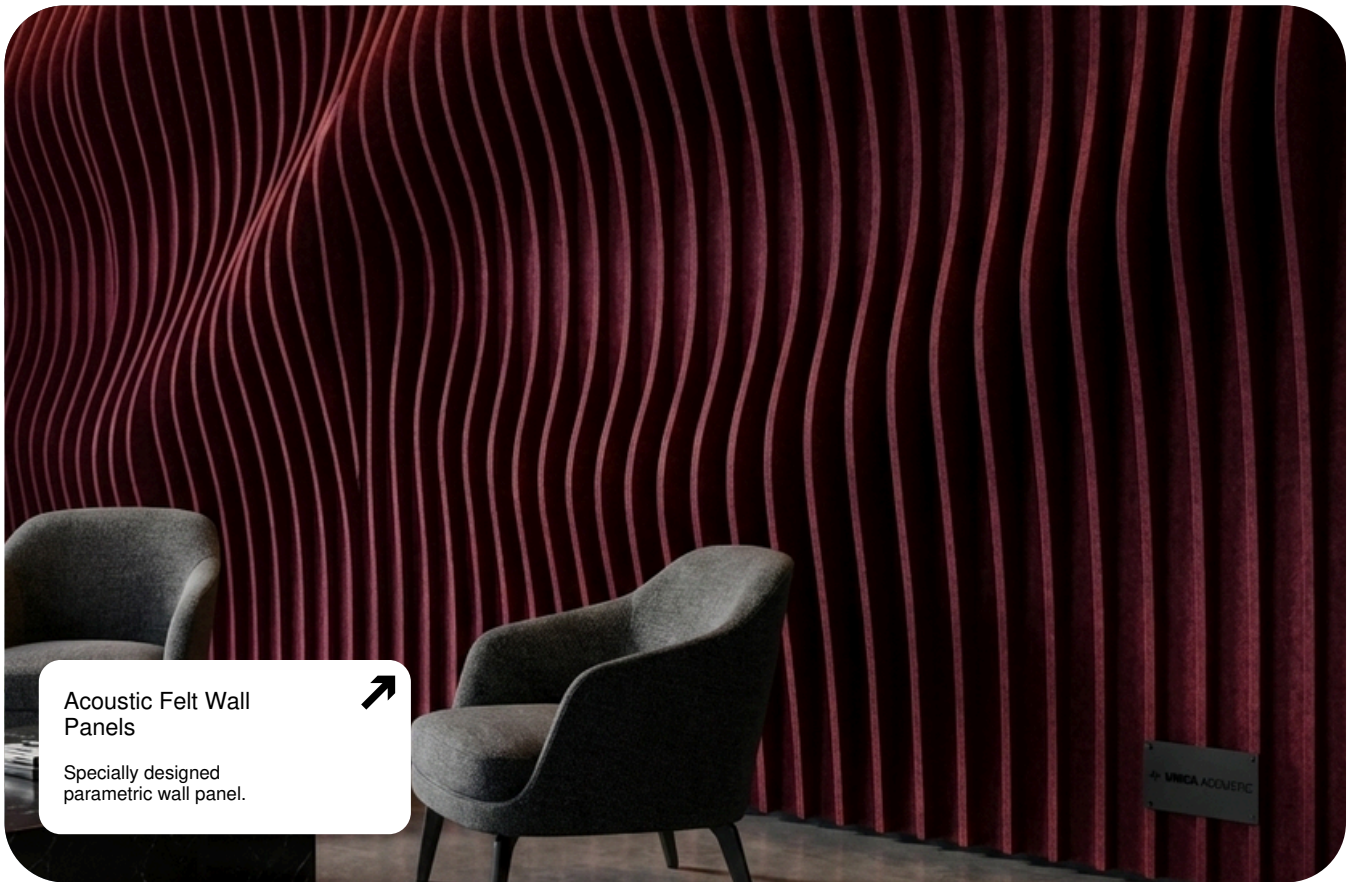
Panel



Acoustic Felt Wall Coverings

Our “Lines” wall covering model from our wall solutions.



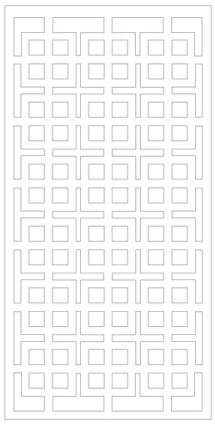
Acoustic Felt Wall Panels

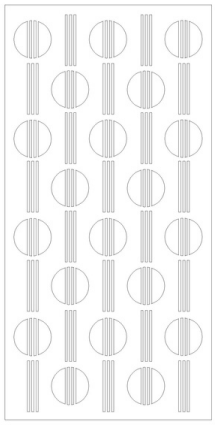
Specially designed parametric wall panel.

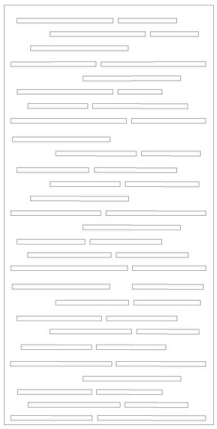
acoustic screens

Acoustic felt screens for visual zoning and sound absorption.

Acoustic screens provide visual zoning and contribute to local sound absorption. Choose a standard pattern or a bespoke form, with colours and available felt thicknesses coordinated for the interior.







Standard collections and bespoke designs for your project.

Acoustic Felt Screens
